

We claim:

- 1 1. An article of clothing comprising:
2 at least one elbow protective device incorporated into each elbow
3 area of the clothing, wherein the elbow protective device includes soft padding
4 covering the elbow area for elbow protection; and
5 at least one knee protective device incorporated into each knee
6 area of the clothing, wherein the knee protective device includes soft padding
7 covering the knee area for knee protection during crawling.
- 1 2. The article of clothing according to claim 1 further
2 comprising a traction device incorporated into at least one outer surface of the
3 knee area or the elbow area, wherein the traction device includes sufficient
4 coefficient of friction to create stable traction during crawling.
- 1 3. The article of clothing according to claim 1, wherein at
2 least one of the soft padding comprises a sufficient quantity of fabric materials
3 to cover the area with a soft and flexible light padding for protection during
4 crawling.
- 1 4. The article of clothing according to claim 1, wherein at
2 least one of the soft padding comprises a sealed soft liquid gel material of at
3 least a sufficient size to cover the area for protection during crawling.

1 5. The article of clothing according to claim 1, wherein at
2 least one of the protective devices is permanently affixed to the article of
3 clothing.

1 6. The article of clothing according to claim 1, wherein at
2 least one of the protective devices further comprises:

3 a removable insert of the soft padding;

4 a receiving pocket adapted to receive the insert, wherein the
5 packet includes a secure tab for securing the insert inside the pocket.

1 7. The article of clothing according to claim 6, wherein the
2 secure tab further comprises any one from the group of at least one button, a
3 zipper, and a hook loop attachment means, for securing the insert inside the
4 pocket.

1 8. The article of clothing according to claim 1, wherein at
2 least one of the protective devices is made of a predetermined decorative shape.

1 9. The article of clothing according to claim 1 further
2 comprising at least one foot protective device incorporated into each foot area
3 of the clothing, wherein the foot protective device includes soft padding
4 covering the foot area for protection of the foot.

1 10. An article of infant clothing comprising at least one knee
2 protective device incorporated into each knee area of the clothing, wherein the
3 knee protective device includes soft padding covering the knee area for
4 protection during crawling.

1 11. The article of infant clothing according to claim 10 further
2 comprising a traction device incorporated into an outer surface of at least one
3 knee area, wherein the traction device includes sufficient coefficient of friction
4 to create stable traction during crawling.

1 12. The article of infant clothing according to claim 10 further
2 comprising at least one foot protective device incorporated into each foot area
3 of the clothing, wherein the foot protective device includes soft padding
4 covering the foot area for protection of the foot during crawling.

1 13. The article of infant clothing according to claim 10,
2 wherein the soft padding of the knee protective device comprises a sufficient
3 quantity of fabric materials to cover the knee area with a soft and flexible light
4 padding for protection during crawling.

1 14. The article of infant clothing according to claim 10,
2 wherein the soft padding of the knee protective device comprises a sealed soft

3 liquid gel material of at least a sufficient size to cover the area for protection
4 during crawling.

1 15. The article of infant clothing according to claim 10,
2 wherein at least one of the protective devices is permanently affixed to the
3 article of clothing.

1 16. The article of infant clothing according to claim 10,
2 wherein at least one of the protective devices further comprises:
3 a removable insert of the soft padding; and
4 a receiving pocket adapted to receive the insert, wherein the
5 packet includes a secure tab for securing the insert inside the pocket.

1 17. The article of infant clothing according to claim 16,
2 wherein the secure tab further comprises any one from the group of at least one
3 button, a zipper, and a hook and loop attachment means, for securing the insert
4 inside the pocket.

1 18. The article of infant clothing according to claim 10,
2 wherein at least one of the protective devices is made of a predetermined
3 decorative shape.

1 19. An article of infant clothing comprising at least one elbow
2 protective device incorporated into each elbow area of the clothing, wherein the
3 elbow protective device includes soft padding covering the elbow area for
4 elbow protection during crawling.

1 20. The article of infant clothing according to claim 19 further
2 comprising a traction device incorporated into an outer surface of at least one
3 elbow area, wherein the traction device includes sufficient coefficient of friction
4 to create stable traction during crawling.
